Summary

GenAI & Full Stack Developer with 1+ years of experience building AI-powered and scalable web applications using Python, Django, React, and AWS. Experienced in LLM integration, Retrieval-Augmented Generation (RAG), vector databases, and AI workflow automation.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++

Tech: React, Django, Node.js, PostgreSQL, MongoDB, AWS, Docker, Tailwind CSS

GenAI: OpenAI, LangChain, ChromaDB, RAG, Vector Embeddings, Semantic Search

Experience

Oodles Technologies

Feb 2025 – Present

Full Stack Developer

Gurugram, Haryana

- Developed AI-powered full-stack applications using **React, TypeScript, Django, Node.js, and WebSockets**, improving interaction speed by **50%**.
- Engineered scalable **REST APIs** and **PostgreSQL** databases, building drag-and-drop CMS platforms that reduced publishing time by **60%**.
- Implemented **JWT/OAuth authentication, RBAC**, and Stripe subscription workflows with webhooks, reducing unauthorized access by **65%**.
- Optimized performance using **pgvector search, caching, connection pooling, and rate limiting**, reducing latency by **45%** across **60+** microservices.

Akshar Consultancy Services Pvt. Ltd.

Jun 2024 – Dec 2024

Frontend Developer Intern

Delhi, Delhi

- Developed responsive **single-page applications (SPAs)** using **React.js, JSX**, and **Tailwind CSS**, ensuring cross-device compatibility.
- Built **modular and reusable React components** using functional components and hooks for scalable frontend architecture.

Projects

Triedent

Jan 2026

- Architected a full-stack marine fleet management platform using **React, Django, PostgreSQL, WebSockets, and AWS**, enabling real-time vessel monitoring, maintenance tracking, crew management, and operational analytics.
- Built a **RAG-powered AI assistant** using **OpenAI, Vanna AI, ChromaDB, and PostgreSQL**, enabling natural language querying of fleet, maintenance, inventory, and crew data.
- Engineered semantic search, vector embedding pipelines, and automated SQL generation workflows, improving information discovery and reducing manual data lookup effort.
- Implemented **JWT authentication, RBAC, REST APIs, and WebSocket-based notifications**, enabling secure, scalable, and real-time multi-user fleet management.

Lightbreak AI | [Live Site](#)

July 2025

- Architected an AI-powered newsletter publishing platform using **React, TypeScript, Django, PostgreSQL, and OpenAI APIs**, enabling content creation, management, and distribution from a unified dashboard.
- Developed automated content ingestion pipelines integrating **RSS feeds, YouTube channels, event calendars, and external data sources**, streamlining editorial workflows and reducing manual content aggregation effort.
- Built AI-assisted content generation and editing workflows, enabling automated article summaries, newsletter composition, and content optimization for publishers.
- Engineered scalable REST APIs, RBAC, sponsor management, and third-party publishing integrations, enabling secure multi-tenant operations and seamless newsletter distribution.

Education

Lovely Professional University

Jul 2020 – May 2024

Bachelor of Technology in Computer Science & Engineering

Phagwara, Punjab
