WORK EXPERIENCE

Oodles Technologies

Associate Consultant - Frontend Developer

Feb' 25 - Present

- Designed and developed **AI-powered frontend applications** using **React, Angular, and TypeScript**, enabling real-time content editing with **streaming APIs and async rendering**.
- Built **drag-and-drop, block-based content editors** using **TipTap/ProseMirror**, implementing component-driven architecture and AST-based parsing for flexible content rendering.
- Architected advanced **state management systems** supporting **undo/redo, autosave, optimistic updates, and conflict resolution**, improving editor reliability and user experience.
- Integrated **JWT-based authentication, role-based access control**, and **AWS S3** for secure, scalable enterprise workflows.
- Optimized UI performance through **memoization, stable key management, and render cycle tuning**, reducing unnecessary re-renders in complex editors.

Akshar Consultancy Services Pvt. Ltd.

Frontend Developer Intern

Jun' 24 - Dec' 24

- Developed responsive **single-page applications (SPAs)** using **React.js, JSX, and Tailwind CSS**, ensuring cross-device compatibility.
- Built **modular and reusable React components** using functional components and hooks for scalable frontend architecture.
- Collaborated with backend teams to integrate REST APIs and deliver end-to-end features.

EDUCATION

Lovely Professional University

Bachelor of Technology (Computer Science and Engineering) - 7.37

Oct' 20 - Jul' 24

PROJECTS

Lightbreak AI

Jul'25 - Present

- Architected a **real-time AI content editing interface** using **React, custom hooks, and streaming APIs**, enabling async rendering and concurrent UI updates.
- Designed and developed a **custom canvas editor using the Konva library**, enabling users to create, position, resize, and layer visual elements for personalized social media and real estate templates.
- Developed a **drag-and-drop, block-based email and content builder** with component-driven architecture and responsive layouts.
- Extended **TipTap/ProseMirror** with custom extensions, implementing **block-based rendering, stable key management**, and **Markdown-HTML transformations**.
- Implemented advanced state handling with **undo/redo, autosave, optimistic updates, bidirectional sync**, and performance memoization.

Accusaga Ai

Feb' 25 - Jul'25

- Built an **enterprise-grade Angular (v19) frontend** using **PrimeNG, Bootstrap, Tailwind, and SCSS** with modular architecture.
- Developed AI-driven **document processing UIs** supporting real-time uploads and multiple formats (PDF, DOCX, PPTX, CSV, JSON, TXT).
- Integrated **AWS S3** for secure file storage and implemented **multi-tenant, role-based access control**.
- Implemented **JWT authentication**, secure routing, forgot-password workflows, and **Elasticsearch-powered search interfaces**.
- Integrated Angular forms with custom regex validation and real-time error handling connected to **Django REST APIs**.

SKILLS

- **Languages:** C++, JavaScript, SQL, Python, Typescript
- **Library/Frameworks:** React.js, Django, Angular
- **Cloud/Databases:** MySQL
- **Dev Tools:** Git, Postman
